

From
The Principal of the Hudson College 386

To the Secy to the Managers Committee

Si On looking over to-day at the Junior
Department rooms I find that Joseph

to have reported that more than one

of the 2000 ft is in a bad condition.

The roofs too of two of the smaller
rooms require repair. The floors

is flooded in one of them that

I have removed the claps to my

own house; and another clasp

also that was sitting under the

skylight in the largest room,

I have thought it right to

remove to the same place for the

present, for the rotten timbers

above present a very threatening

appearance. I think it will

be absolutely necessary to send

for a builder to inspect the

roof without delay.

I am Mr. Board to remain

Yours obediently

D. L. Robertson
