

CONTENTS

- **List of Figures**

- **List of Tables**

1. CHAPTER 1: INTRODUCTION	01
2. CHAPTER 2: GEOLOGICAL BACKGROUND	10
2.1 Krishna Province	11
2.2 Eastern Ghats Province	14
2.3 Rengali Province	21
2.4 Jeypore Province	22
2.5 Eastern Ghats Belt and its boundary relations with the cratons	23
3. CHAPTER 3: LITHOLOGY	27
3.1 Aluminous granulite	27
3.2 Calc-silicate granulite	28
3.3 Felsic gneiss	28
3.4 Charnockitic rocks	29
3.5 Metasomatic rock at the contacts of calc-silicate granulite and coarse-grained charnockite	30
3.6 Mafic granulite	30
4. CHAPTER 4: STRUCTURAL FRAMEWORK	32
4.1 Developments of structural fabrics in regional scale	33
4.2 Synthesis of the structural elements and deformation phases	39

5. CHAPTER 5: METAMORPHIC EVOLUTION OF THE ALUMINOUS GRANULITE	41
5.1 EPMA methodology	41
5.2 Petrography and mineral chemistry of aluminous layers	42
5.3 Petrography and mineral chemistry of quartzofeldspathic layers	45
5.4 Evolution of the mineral assemblages	46
5.5 Geothermobarometry of aluminous granulite	51
5.6 Phase diagram modeling	52
5.7 Summary	56
6. CHAPTER 6: METAMORPHIC EVOLUTION OF THE ASSOCIATED ROCKS	57
6.1 EPMA methodology	57
6.2 Textural characters of the associated rocks	57
6.3 Geothermobarometry of the associated rocks	63
6.4 Phase diagram modeling	63
6.5 Metasomatic replacement at the contact of the calc-silicate granulite and coarse-grained charnockite	65
6.6 Summary	68
7. CHAPTER 7: MICROSTRUCTURAL STUDY	69
7.1 Methodology	69
7.2 Microstructural study from the N-S trending ductile shear zone	70
7.3 Microstructural study from Ranipathar shear zone (RSZ)	70
7.4 Crystallographic preferred orientation (CPO) development	72
7.5 Summary	73

8. CHAPTER 8: FLUID EVOLUTION	74
8.1 Analytical methods	74
8.2 Fluid inclusion study	75
8.3 Fluid-induced textural and chemical changes in the RSZ	80
8.4 Feldspar composition and texture	81
8.5 Summary	82
9. CHAPTER 9: GEOCHRONOLOGY	84
9.1 Sample description	84
9.2 Methodology	88
9.3 Results	91
9.3.1 Zircon morphology	91
9.3.2 Zircon U-Pb analytical data	94
9.3.3 Monazite U-Th-total Pb data	98
9.4 Summary	101
10. CHAPTER 10: DISCUSSION	103
10.1 Geological evolution of the Phulbani domain	103
10.2 Emplacement of granite: a part of the basement of the Eastern Ghats Province?	120
10.3 Phulbani and Visakhapatnam domains in the framework of the EGP and its connection with Rodinia	122
11. REFERENCES	125
