

Contents

1	Introduction	1
1.1	Overview of Chapters	2
2	Comaximal Subgroup Graph of a Group	5
2.1	Introduction	5
2.1.1	Preliminaries	6
2.1.2	Previous Works	8
2.2	Isolated Vertices and Connectedness of $\Gamma(G)$	9
2.3	Some Characterizations of $\Gamma(G)$ and $\Gamma^*(G)$	18
2.4	Independence Number and Chromatic Number of $\Gamma(G)$	31
2.5	Perfectness of $\Gamma(G)$	34
2.6	Classification upto Isomorphism	45
2.7	Conclusion and Open Issues	52
3	Co-Maximal Subgroup Graph of \mathbb{Z}_n and D_n	54
3.1	Co-Maximal Subgroup Graph of \mathbb{Z}_n	54
3.1.1	Basic Properties of $\Gamma(\mathbb{Z}_n)$	54
3.1.2	Hamiltonicity, Perfectness and Dominating Sets of $\Gamma(\mathbb{Z}_n)$	57
3.1.3	Isomorphisms	62
3.2	Co-Maximal Subgroup Graph of D_n	64
3.2.1	Structural Properties of $\Gamma(D_n)$ and $\Gamma^*(D_n)$	64
3.2.2	Domination number, Chromatic Number and Perfectness of $\Gamma(D_n)$	74

3.2.3	Isomorphisms of $\Gamma(D_n)$	81
3.3	Conclusion and Open Issues	86
4	Prime Ideal Sum Graph of a Commutative Ring	87
4.1	Connectedness of $PIS(R)$	89
4.2	Girth and Domination Number of $PIS(R)$	94
4.3	Homomorphisms of $PIS(R)$	97
4.4	Prime Ideal Sum Graph of a General ZPI-Ring	99
5	Annihilating-Ideal Graph of \mathbb{Z}_n	109
5.1	Definitions and Previous Results	109
5.2	Proof of Theorem 5.1.1	110
6	Conclusion	124
	Bibliography	125
